Experience

Frontend Simplified

Junior Frontend Developer | September 2024 – April 2026

- Developed responsive web applications using JavaScript, React, Next.js, HTML5, and CSS, implementing reusable components and maintainable frontend architectures.
- Integrated REST APIs and asynchronous JavaScript to retrieve, process, and dynamically render application data.
- Implemented interactive UI components and state management to support dynamic user interactions and application functionality.
- Collaborated with mentors and fellow developers through code reviews, technical discussions, and project feedback to improve code quality and frontend development practices.
- Troubleshot frontend issues and refined application functionality through debugging, testing, and iterative development.

SaveSpend

Next.js, JavaScript, Tailwind CSS, Firebase, OpenAI API | October 2025 – December 2025
[https://save-spend.vercel.app/] | [https://github.com/BenjaminBatres/SaveSpend]

- Built a personal finance application that helps users manage budgets, track spending, and organize upcoming expenses.
- Developed budgeting, bills, and subscription management features to help users monitor recurring and planned expenses.
- Integrated the OpenAI API to provide users with an interactive AI-powered financial assistant.
- Built responsive interfaces with Tailwind CSS and reusable React components focused on intuitive user interactions.
- Implemented Firebase-based data management to support user-specific financial information and application functionality.

Skinstric AI

Next.js, JavaScript, Tailwind CSS | March 2025 – April 2025
[https://skintric-project.vercel.app/] | [https://github.com/BenjaminBatres/Skinstric-Project]

- Built a responsive AI-powered skin analysis application using Next.js and the OpenAI Vision API.
- Developed interactive skincare recommendation interfaces using Tailwind CSS and keyframe animations.
- Integrated image analysis functionality to process user-submitted images and display personalized results.
- Created reusable UI components for skincare recommendations and product information.
- Implemented responsive layouts and interactive animations to create a smooth and engaging user experience.

Forma | E-Commerce Website

Next.js, React, TypeScript, Redux, REST API, Motion, Tailwind CSS | October 2026 – October 2026
[https://forma-one-kappa.vercel.app/] | [https://github.com/BenjaminBatres/forma]

- Developed a responsive e-commerce application using Next.js, TypeScript, and Tailwind CSS, integrating REST APIs to dynamically fetch and display product data.
- Implemented product discovery features, including search functionality, category filtering, and loading states, to improve product browsing and user experience.
- Managed global application state using Redux, enabling persistent shopping cart and wishlist functionality across components.
- Built interactive shopping experiences, including a cart sidebar, wishlist, and checkout page, with animated UI transitions using Motion

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Redux, Tailwind CSS, Motion

API & Data: REST APIs, JSON, Firebase, OpenAI API, Prisma

Development Tools: Git, GitHub, Jest, React Testing Library, Vercel, Figma

Core Concepts: Asynchronous JavaScript, State Management, Responsive Web Design, Reusable Components, API Integration

Education / Training

Frontend Simplified Bootcamp |
September 2024 - April 2026

Front End Now mentorship program |
April 2026 - Present
